Portfolio

PROFILE SUMMARY

MCA student graduating in 2027 with hands-on experience in software development, data science, machine learning and generative AI. Delivered a client application and built projects involving Flask, voice interfaces and retrieval-augmented generation (RAG). Skilled in Python, Java and SQL, with knowledge of data analysis, object-oriented programming, data structures, DBMS and software engineering.

EDUCATION

Master of Computer Applications (MCA) *Expected 2027*
GH Raisoni College of Engineering and Management, Nagpur, Maharashtra | Current CGPA: 9.7 / 10.0

Bachelor of Computer Application (BCA) *Graduated 2025*
Santaji Mahavidyalaya, Nagpur, Maharashtra | Percentage: 82.25%

TECHNICAL SKILLS

Languages : Python, Java, SQL

AI and Data : LLM integration, Retrieval-Augmented Generation (RAG), Ollama, scikit-learn, LiveKit, Pandas

Backend : Flask, SQLAlchemy, REST APIs

Databases : PostgreSQL , MySQL, ChromaDB

Tools and Development : Jupyter Lab, VS Code, Google Colab, Git/GitHub, Render, Postman

Core Concepts : Software Engineering, Object-Oriented Programming, Data Structures and Algorithms, DBMS, Operating Systems

EXPERIENCE

Freelance Backend Developer : *Remote Client Project: PG Finder , June-2026*

- Designed and delivered a full-stack "Paying Guest" discovery platform for a local client using Python and Flask.
- Architected a PostgreSQL database to securely manage property listings, tenant details, and availability status.

PROJECTS

InterviewAI — AI-Powered Voice Interview Simulator : *Python, Flask, LiveKit, WebRTC, Gemini, PostgreSQL*
Live | GitHub

- Developed an AI-powered interview platform that generates role-specific interview questions by analyzing resumes and job descriptions using LLMs.
- Integrated a real-time voice agent using LiveKit, WebRTC, streaming STT/TTS, and LLMs for interactive, voice-based interviews.
- Implemented AI-driven answer evaluation, adaptive follow-up questions, and automated performance scorecards using Gemini.
- Built a Flask backend with PostgreSQL for interview management, session persistence, and secure API integration.

Local RAG AI Assistant for Educational Video Content : *Python, Whisper, FFmpeg, Ollama, BGE-M3, ChromaDB, Llama 3.2*
GitHub

- Built a Python pipeline using FFmpeg and Whisper to transcribe lecture videos into timestamped text chunks.
- Generated BGE-M3 embeddings through Ollama and indexed transcript chunks and metadata in ChromaDB.
- Retrieved the five most relevant segments using cosine similarity and supplied them to Llama 3.2 to generate answers with video titles and timestamp references.

Digital Queue Management System (SaaS Platform) : *Python, Flask, PostgreSQL, SQLAlchemy, OpenRouteService API, Brevo API, Chart.js*
Live | GitHub

- Developed a queue management platform with separate user, service-center admin and super-admin portals for token booking and queue administration.
- Implemented online and walk-in queues, cancellation handling, token-status transitions and automatic wait-time recalculation.
- Integrated OpenRouteService travel-time estimates, Brevo email notifications and Chart.js analytics; deployed the application on Render

CERTIFICATIONS

AI Fundamentals: Foundations for Understanding AI | IBM SkillsBuild
Fundamentals of Agents | Hugging Face
SQL | Kaggle

ACHIEVEMENTS

- 96.59 percentile, Naukri Campus Young Turks 2026; Certificate of Merit (Oct 2026).
- 1st place, Code Battle 1.0 (Mar 2026): built a Flask backend for a placement tracker.
