SAHIL TELTUMDE

Nagpur, Maharashtra, India | 9022399164 | sahilteltumde27@gmail.com | Github | LinkedIn

PROFILE SUMMARY

Data Science and GenAI-focused MCA student with hands-on experience building Python applications and a local RAG teaching assistant using Whisper, Ollama, BGE-M3, and semantic retrieval. Skilled in Python, SQL, pandas, scikit-learn and flask; seeking a Data Science, Machine Learning, or GenAI internship.

EDUCATION

Master of Computer Applications (MCA) *Expected 2027*
GH Raisoni College of Engineering and Management, Nagpur, Maharashtra | Current CGPA: 9.7 / 10.0

Bachelor of Computer Application (BCA) *Graduated 2025*
Santaji Mahavidyalaya, Nagpur, Maharashtra | Percentage: 82.25%

TECHNICAL SKILLS

Languages: Python, Java, SQL

Data Science & ML: Pandas, NumPy, scikit-learn, Matplotlib, Seaborn,Tensorflow ,Machine Learning, Deep Learning and Neural Networks,MySql,Beautiful Soup

Frameworks: Flask

Databases & APIs: PostgreSQL (Neon), MySQL, REST APIs, Brevo API, OpenRouteService API, Postman

Tools & Platforms: Jupyter Lab, Pycharm , MySql Workbench , Google Colab ,Git/GitHub, Render

Core Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), , DevOps and CI/CD fundamentals

EXPERIENCE

Freelance Backend Developer : *Remote Client Project: PG Finder , June-2026*

- Designed and delivered a full-stack "Paying Guest" discovery platform for a local client using Python and Flask.
- Architected a PostgreSQL database to securely manage property listings, tenant details, and availability status.

PROJECTS

DevTrack — Internship Application Tracker : *Flask, PostgreSQL, SQLAlchemy, REST API, Chart.js*
Live | Github

- Developed and deployed a full-stack internship tracker to Render in 15 days, utilizing 4 Flask blueprints and SQLAlchemy ORM.
- Engineered a secure REST API with Bearer token authentication and custom-validated CRUD functionality to eliminate errors.
- Implemented dynamic search, filtering, pagination, and Chart.js data visualizations to analyze and present trends across 100+ application records.

Local RAG AI Assistant for Educational Video Content : *Python, Whisper, Ollama, BGE-M3, Llama 3.2, scikit-learn, Pandas, FFmpeg*
Github

- Constructed an offline processing pipeline to extract audio from lecture videos, generating accurate Hindi transcriptions via Whisper while retaining timestamped metadata.
- Produced BGE-M3 vector embeddings for segmented transcript passages through Ollama, persisting contextual metadata for efficient semantic query matching.
- Engineered cosine similarity search to retrieve the top 5 relevant text segments, powering grounded Llama 3.2 responses complete with video titles and exact timestamp references.

Digital Queue Management System (SaaS Platform) : *Python, Flask, SQL, APIs*
Live | Github

- Developed a multi-tenant SaaS queue platform for clinics, integrating the OpenRouteService API to deliver live tracking for users.
- Automated queue-position email notifications by integrating the Brevo API and digitizing client flow accuracy.

ACHIEVEMENTS & EXTRACURRICULARS

- Won 1st Place at Code Battle 1.0 (March 2026) by building a Flask backend for a placement tracker.
